Ima

I will place the black and white cover on the inside of the folder. I will place most of the other printables behind the cover. I will place the summer journal in one of the pockets. I have also provided a note for the parents about how to help their child with writing.

<u>Just for Fun Activities</u>

Throughout the summer, students participate in these just for fun activities. After each activity, the child colors in a sunshine to show it is done. When all suns are colored in, the student can be rewarded. <u>Instructions</u> Print page 10 and staple it to the outside of an inexpensive two pocket folder.

Print pages 11-60 and use a hole punch to punch three holes in each Place the pages in order in a two pocket folder. Some of the activities can be copied front and back, and some cannot be due to cutting.

Print pages 61-70 and use the pages to create a Summer journal for the students. I will paperclip the writing instruction sheet to the front of each journal before sending the journal home. Place the journal in the pocket of the folder.

Print pages 71-76. Use these pages to create the "My favorite summer days" book. Place the book in the pocket of the folder.

Please use this summer practice packet to help your child practice and review the skills that he or she learned in Kindergarten. Children often regress during the summer months if they do not continue to practice reading, writing, and math fundamentals. Keeping your child's academic skills refreshed during the summer months will help ensure that he or she will be ready for the next grade.

This packet includes 4 sections:

Math Review Printables Communication Arts Review Printables Summer Journal & My Favorite Summer Days Book Additional Activities "Just For Fun"

How Many Sides?

Kindergarten students are expected to add and subtract with fluency. Use these flash cards to help your child practice.

The following pages of additional activities can be used to help your child practice reading, writing, and math skills. Each page contains 6 different activities that could be used to review skills that Kindergarten students learn during kindergarten. As your child completes each activity, have him or her color in the sunshine beside the activity. When all of the suns have been colored in on a page, reward your child with a special treat.

Summer Writing

0

0

0

Encourage your child to keep a summer journal. Have your child write a few sentences every day in his or her journal. When your child is writing, encourage your child to use the sight words that he or she knows. Also encourage your child to "stretch and spell" the words that he or she does not know. Young children do not need to worry about spelling every word correctly. Instead,

0

0

0

6

0

0

encourage your child to listen for the sounds that they hear in the words that they want to spell. It

is more important for your child to develop independence and confidence in writing, instead of perfection. Also encourage your child to capitalize the beginning letter of each sentence, leave spaces between their words, and use ending punctuation. The more writing practice your child gets, the easier it will be for your child to write once school begins.
