Bugs and Limitations in the Software

When inserting a file it only allows you to upload a file from your computer. If you want to access files from OneDrive, download the OneDrive app to your computer.

The OneNote app on the computer will automatically convert Power Point and Excel files to a PDF file, NOT the online version

Inserting Forms (Quizzes or surveys) into a page can only be viewed on the online version of Teams.

Cannot embed anything you want.

Syncing gets clunky and adding pages to all the students' notebooks takes a long time.

The Teams app online only allows you to Manage your Teams. It will not allow you to add or remove students.

Bugs and Limitations in the Software 2

Cannot find a way to import a Notebook. May not be available for Mac

You can only save a Notebook Backup to OneDrive.

There is a workaround to download it to your computer. After creating a Notebook backup in OneDrive open the created Notebook folder, click on the download button and all the Notebooks are downloaded as a .zip files.

You can only print a single page within a section in OneNote for Mac. You cannot print a PDF of the entire notebook. Maybe in Windows?

No way to escape out of Reading View within Teams. Must close out of Notebook and open the Notebook up again.
