

Enrichment Programs

The purpose of the Enrichment Committee is to support the enrichment activities for the PEARLS' gifted and academically talented program. The committee endorses equitable project funding for PEARLS' both across grades and disciplines.* Please contact us for more information at pta-pearls@yonkerspublicschools.org

The Enrichment Committee encourages teachers to submit proposals. We also seek to function as a resource for the teachers and administrators by researching and suggesting quality enrichment programming that supports the PEARLS' curriculum. **TEACHERS**, please click [Here](#) for **Enrichment Funding Form**. After completing this form, please submit it to pta-pearls@yonkerspublicschools.org, or print it out and place in the PTA box in the main office.

We collaborate with the faculty and administration to fund, research, plan for, and identify strong and exciting programs for PEARLS' kids. Thus far efforts have centered almost entirely on programs that take place during the school day.**

We hope our efforts and effectiveness as a committee will also bring more interest from new (and old) parents to the PTA at large, and that it will foster strong communication between all groups in the PTA. We welcome feedback from the general PTA membership and non-member parents and guardians.

*The committee takes into account that some grades contain more students than others, and some disciplines are better represented within the current school curricula. (We also hope to nurture and develop programs that are hands on and involve kids in a physical and active way.)

**The committee understands that parents often desire that the Enrichment Committee develop quality after-school programming or during-school "clubs," (drama club, etc.).
